Roadside native planting

In collaboration with the Clarence City Council's Natural Assets Officer we obtained a CCC Land and Coast Care Grant to replant the northern verge of Honeywood Drive with native plant species. As part of the council's *Morrisby Gum Flora Recovery Plan* Morrisby Gums (*eucalyptus morrisbyi*) form the bulk of the over story, along with other native shrubs and groundcover. Preparatory work, including the removal of Briar Rose and other exotic weeds was completed in June.

On Sunday 13th August nine volunteers planted 50 Morrisby Gums and over 150 shrubs and ground cover. A good morning's work ably assisted by Justin Burgess, CCC Natural Assets Officer who set up the roadside safety signage and stayed to work with us. Ongoing watering and maintenance will be coordinated by the Wildcare group.
